Technical Datasheet

General information

Name of the sub-fund	Perinvest Asia Dividend Equity, a sub-fund of Perinvest (Lux) SICAV			
Legal form	Sub-fund of a SICAV under Luxembourg law			
Type of financial product	Undertaking for Collective Investment			
Duration of the product	Indefinite			
Currency	USD			
Investment objective	<p>The investment objective of the sub-fund is to earn a reasonable dividend yield each year and to exceed the Morgan Stanley Capital International Asia Ex Japan Index over the medium to long term.</p> <p>Under normal conditions, the sub-fund principally invests in shares of small and medium companies, whose securities are listed on an Asian stock exchange, or have their registered office in, or conduct the predominant part of their business activities in Asia. The sub-fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management, but not to directly seek investment gains. The investment manager uses economic data, onsite visits and management calls to determine the level of investment in companies that appear to have the potential for growth.</p>

GLOSSARY

CONSUMER DISCRETIONARY SECTOR: The Consumer Discretionary Sector encompasses those businesses that tend to be the most sensitive to economic cycles. Its manufacturing segment includes automotive, household durable goods, leisure equipment and textiles & apparel. The services segment includes hotels, restaurants and other leisure facilities, media production and services, and consumer retailing and services.

CONSUMER STAPLES SECTOR: The Consumer Staples Sector comprises companies whose businesses are less sensitive to economic cycles. It includes manufacturers and distributors of food, beverages and tobacco and producers of non-durable household goods and personal products. It also includes food & drug retailing companies as well as hypermarkets and consumer super centers.

STOCK MARKET CAPITALISATION: a company's total value at a given point in time, obtained by multiplying the stock market price by the number of shares in circulation. There are three commonly recognised categories of capitalisation, namely large caps (>2 billion \$), midcaps (between 0.4 and 2 billion \$) and small caps (< 0.4 billion \$). Stock market capitalisation and the volume of shares traded on a daily basis are used as indicators of the liquidity of the shares selected
