

TreeTop Sequoia Equity Sub-fund of TreeTop Global SICAV

Managed by TreeTop Asset Management S.A., management company under Luxembourg law

The present Quarterly Report on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Investor Information Document (KIID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

Technical Datasheet

General Information

Name of the sub-fund	TreeTop Sequoia Equity, a sub-fund of TreeTop Global SICAV			
Legal form	Sub-fund of a SICAV under Luxembourg law			
Type of financial product	Undertaking for Collective Investment			
Duration of the product	Indefinite			
Currency	EUR			
Investment objective	<p>The sub-fund aims to increase the value of your investment over the long term. Under normal market conditions, the sub-fund invests mainly in shares from issuers anywhere in the world, including in emerging markets, China and Russia. The sub-fund also invests in other types of securities that are consistent with its objective. The sub-fund may use derivatives for investment purposes or to reduce investment risks (hedging).</p> <p>The fund management team selects - based on criteria such as product innovation, quality of management, sector leadership, valuation - companies around the world that appear to offer solid growth prospects or whose securities seem to them undervalued. The sub-fund invests in a concentrated portfolio made of shares of these companies and/or in financial instruments convertible in shares or entitling the sub-fund to acquire shares of these companies. The sub-fund invests mostly in mid-cap and large-cap companies. For the AH share class only, the manager's objective is to hedge positions in currencies other than the Euro which represent more than 2.5% of the net asset value of the share class.</p> <p>The MSCI All Country World index provides a reference of the investment universe of the fund manager. It is provided for information purpose only as indeed the sub-fund is managed on a discretionary basis and its portfolio will show a significant departure from the index.</p> <p>The sub-fund may not be appropriate for investors who plan to withdraw their money within 6 years.</p> <p>The share classes do not distribute dividends (meaning that any income earned by the sub-fund is added to the share price).</p> <p>You can place orders to buy or sell shares of the sub-fund daily.</p> <p>These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KIID.</p>

Risk and Reward Profile

This risk profile applies to AH, B and C share classes, the A share class being at 5

The sub-fund does not offer either protection or any capital guarantee or a guaranteed yield. The risk/reward rating of the fund reflects the following factors: 1) it may invest in a limited number of shares, and 2) it may favour particular economic sectors or regions, including emerging markets.

Moreover, it is also exposed to the following risks: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund), legal and tax risks (the sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive).

GLOSSARY

CONSUMER DISCRETIONARY SECTOR: The Consumer Discretionary Sector encompasses those businesses that tend to be the most sensitive to economic cycles. Its manufacturing segment includes automotive, household durable goods, leisure equipment and textiles & apparel. The services segment includes hotels, restaurants and other leisure facilities, media production and services, and consumer retailing and services.

CONSUMER STAPLES SECTOR: The Consumer Staples Sector comprises companies whose businesses are less sensitive to economic cycles. It includes manufacturers and distributors of food, beverages and tobacco and producers of non-durable household goods and personal products. It also includes food & drug retailing companies as well as hypermarkets and consumer super centers.

LONG TERM GROWTH (LTG): an estimate, by analysts, of a company's earnings per share growth rate.

P/E or PER (Price-Earnings Ratio): this ratio gives the rate at which a company capitalises its annual earnings. It is an indicator of a share's relative expensiveness. As a general rule, this ratio is influenced by the stock's sector and quality: thus growth stocks will have higher multiples than cyclical stocks. Increased momentum normally leads to a revaluation of the PER, which has a multiplier effect on the

stock market price. The inverse of the PER is the earnings yield of a share, which can be compared to a bond yield.

PERFORMANCE CONTRIBUTION: it represents the performance (excluding currency exchange impact), positive or negative, realised for each security held over a given period of time (quarter or year). The same calculation is performed by country and by economic sector. The absolute performance contribution charts show the 15 most important contributions of the portfolio, positive or negative.

RETURN ON EQUITY (ROE): the ratio between a company's net profit and shareholders' equity (capital + reserves). This is a good criterion for assessing whether the management is making good use of the capital provided by shareholders.

STOCK MARKET CAPITALISATION: a company's total value at a given point in time, obtained by multiplying the stock market price by the number of shares in circulation. There are three commonly recognised categories of capitalisation, namely large caps (>2 billion \$), midcaps (between 0.4 and 2 billion \$) and small caps (< 0.4 billion \$). Stock market capitalisation and the volume of shares traded on a daily basis are used as indicators of the liquidity of the shares selected.
