

TreeTop Sequoia Equity Sub-fund of TreeTop Global SICAV

Managed by TreeTop Asset Management S.A., management company under Luxembourg law

The present marketing communication on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Information Document (KID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

Technical Datasheet

General Information

Name of the sub-fund	TreeTop Sequoia Equity, a sub-fund of TreeTop Global SICAV			
Legal form	Sub-fund of a SICAV under Luxembourg law			
Type of financial product	Undertaking for Collective Investment			
Duration of the product	Indefinite			
Currency	EUR			
Investment objective (related to class AH EUR)	<p>The product aims to increase the value of your investment over the long term. Under normal market conditions, the product invests primarily in shares of issuers around the world, including emerging markets, China and Russia. It also invests in other types of securities consistent with its investment objective. The product may also use derivatives for investment purposes or to reduce investment risk (hedging). The product invests in a portfolio of approximately 50 stocks and consists mainly of stocks of multinational companies offering a high dividend yield and/or instruments convertible into shares or giving the right to acquire shares of these companies. It invests primarily in mid to large capitalization companies. The manager's objective is to hedge positions in currencies other than EUR representing more than 2.5% of the net asset value of the product. This product does not distribute dividends (which means that the income generated is added to the price of the product). You may place orders to buy or sell the product on a daily basis. The product is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 6 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio. These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID. The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset. The product is actively managed.</p>			
Share classes	Class	Dividend policy	Launch date	ISIN code
	AH EUR	Capitalisation	22/06/2006	LU0257173335
	A EUR	Capitalisation	02/07/2018	LU1836394475
	B USD	Capitalisation	22/06/2006	LU0257174143
Manager	Jacques Berghmans			
Sub-fund assets (as of 30/06/2023)	€ 95 million			
Recommended holding period	More than 6 years

Belgian savings tax on redemption	Not applicable
Belgian withholding tax	Not applicable
	The tax regime applies to an average retail customer, being a natural person residing in Belgium.

Risk Indicator (class AH EUR)

For further information on the risk indicator of the fund, please refer to the latest KID.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the product invests and therefore the value of the product itself.

This level of risk reflects the fact that the product invests in a limited number of shares, and may favor particular economic sectors or regions, including emerging markets.

Under unusual market conditions, other risks could arise: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), counterparty (the product could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the product), legal and tax risks (the product could be affected by foreign legal and tax changes, some of which may be retroactive). Please refer to the prospectus for more details.

As this product does not include capital protection, particularly against market fluctuations, you could lose all or part of your investment, but not more than the amount of your investment.

Legal Information

This Quarterly Report should not be considered as investment advice.

The management company may, under the conditions provided for by article 93bis of Directive 2009/65/EC, decide to suspend the sales of the fund's share classes in Belgium. Investors will then have a period of notice allowing them to exit free of charge.

Complaints can be addressed to the attention of the "Compliance Officer", at the following address: TreeTop Asset Management Belgium, rue des Francs, 79 b7, 1040 Brussels. We will send you an acknowledgement of receipt within 5 working days. We will analyze your complaint, if necessary in consultation with the management company, and give a detailed response in the month following its receipt, provided that the complaint is complete and specific.

Complaints relating to investment products and services can be addressed to the Ombudsfm (Banks, Credits and Investments Mediation Service), North Gate II, Avenue Roi Albert II 8, B-1000 Brussels (www.ombudsfm.be or ombudsman@ombudsfm.be). The mediation service may suggest solutions for resolving the dispute. In the event of a lack of mutual acceptance of the proposed solutions, either party can turn to the competent courts.

You can obtain a summary of the rights of investors at <https://www.treetopam.com/en/regulatory-information> (in English) in the section "Rights of investors in UCIs managed by TreeTop".

The word "**FUND**" is used as a generic term to designate a SICAV or a sub-fund of a SICAV.

CONSUMER DISCRETIONARY SECTOR: The Consumer Discretionary Sector encompasses those businesses that tend to be the most sensitive to economic cycles. Its manufacturing segment includes automotive, household durable goods, leisure equipment and textiles & apparel. The services segment includes hotels, restaurants and other leisure facilities, media production and services, and consumer retailing and services.

CONSUMER STAPLES SECTOR: The Consumer Staples Sector comprises companies whose businesses are less sensitive to economic cycles. It includes manufacturers and distributors of food, beverages and tobacco and producers of non-durable household goods and personal products. It also includes food & drug retailing companies as well as hypermarkets and consumer super centers.

LONG TERM GROWTH (LTG): an estimate, by analysts, of a company's earnings per share growth rate.

P/E or PER (Price-Earnings Ratio): this ratio gives the rate at which a company capitalises its annual earnings. It is an indicator of a share's relative expensiveness. As a general rule, this ratio is influenced by the stock's sector and quality: thus growth stocks will have higher multiples than cyclical

stocks. Increased momentum normally leads to a revaluation of the PER, which has a multiplier effect on the stock market price. The inverse of the PER is the earnings yield of a share, which can be compared to a bond yield.

PERFORMANCE CONTRIBUTION: it represents the performance (excluding currency exchange impact), positive or negative, realised for each security held over a given period of time (quarter or year). The same calculation is performed by country and by economic sector. The absolute performance contribution charts show the 15 most important contributions of the portfolio, positive or negative.

RETURN ON EQUITY (ROE): the ratio between a company's net profit and shareholders' equity (capital + reserves). This is a good criterion for assessing whether the management is making good use of the capital provided by shareholders.

STOCK MARKET CAPITALISATION: a company's total value at a given point in time, obtained by multiplying the stock market price by the number of shares in circulation. There are three commonly recognised categories of capitalisation, namely large caps (>2 billion \$), midcaps (between 0.4 and 2 billion \$) and small caps (< 0.4 billion \$). Stock market capitalisation and the volume of shares traded on a daily basis are used as indicators of the liquidity of the shares selected.
