### Technical Datasheet

#### General information

<b>Name of the sub-fund</b>	TreeTop Global Balanced, a sub-fund of TreeTop Global SICAV			
<b>Legal form</b>	Sub-fund of a SICAV under Luxembourg law			
<b>Type of financial product</b>	Undertaking for Collective Investment			
<b>Duration of the product</b>	Indefinite			
<b>Currency</b>	EUR			
<b>Investment objective (related to class AH EUR)</b>	<p>The product aims to increase the value of your investment over the long term through active management of a diversified portfolio composed of different asset classes.</p> <p>Under normal market conditions, the product invests in a diversified portfolio of different asset classes. It may be exposed firstly to international shares and secondly to interest rate instruments, including bonds, money market instruments and bank deposits. Exposure to interest rate instruments results either from direct investment in such instruments or from indirect investment through units in collective investment schemes invested in such instruments. The product may also use derivatives for investment purposes or to reduce investment risk (hedging). The product may invest in securities from issuers anywhere in the world, including in emerging markets. The product's exposure to the equity asset class will not exceed 60%. In order to diversify the sources of performance, the product is managed by different fund managers of TreeTop Asset Management, each applying its own approach to global active management. The product is managed on a discretionary basis without reference to a market index.</p> <p>The manager's objective is to hedge positions in currencies other than EUR representing more than 2.5% of the net asset value of the product.</p> <p>This product does not distribute dividends (which means that the income generated is added to the price of the product).</p> <p>You may place orders to buy or sell the product on a daily basis.</p> <p>The product is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 4 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio.</p> <p>These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.</p> <p>The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset.</p>

### Risk Indicator (class AH EUR)

For further information on the risks and the risk indicator of the fund, please refer to the latest KID of the concerned classes.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This indicator assesses potential losses in future returns at a medium-low level, and it is unlikely that poor market conditions will affect the value of the shares in which the product invests and therefore the value of the product itself.

This level of risk reflects the fact that the product invests up to 60% of its assets in shares, that it may invest part of its portfolio in warrants or call options on shares, which are more volatile than shares and may lose all their value at expiry date, and finally because it may favor particular economic sectors or regions, including emerging markets.

Under unusual market conditions, additional risks could arise: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), default (an issuer's bonds could become worthless if it is unable

to repay its debts), counterparty (the product could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the product), legal and tax risks (the product could be affected by foreign legal and tax changes, some of which may be retroactive). Please refer to the prospectus for more details.  
This product does not include any protection from future market performance so you could lose some or all of your investment.
