GLOSSARY

CONSUMER DISCRETIONARY SECTOR: The Consumer Discretionary Sector encompasses those businesses that tend to be the most sensitive to economic cycles. Its manufacturing segment includes automotive, household durable goods, leisure equipment and textiles & apparel. The services segment includes hotels, restaurants and other leisure facilities, media production and services, and consumer retailing and services.

CONSUMER STAPLES SECTOR: The Consumer Staples Sector comprises companies whose businesses are less sensitive to economic cycles. It includes manufacturers and distributors of food, beverages and tobacco and producers of non-durable household goods and personal products. It also includes food & drug retailing companies as well as hypermarkets and consumer super centers.

PERFORMANCE CONTRIBUTION: it represents the performance (excluding currency exchange impact), positive or negative, realised for each security held over a given period of time (quarter or year). The same calculation is performed by country and by economic sector. The absolute performance contribution charts show the 15 most important contributions of the portfolio, positive or negative.

STOCK MARKET CAPITALISATION: a company's total value at a given point in time, obtained by multiplying the stock market price by the number of shares in circulation. There are three commonly recognised categories of capitalisation, namely large caps (>2 billion \$), midcaps (between 0.4 and 2 billion \$) and small caps (< 0.4 billion \$). Stock market capitalisation and the volume of shares traded on a daily basis are used as indicators of the liquidity of the shares selected.
