

The present Monthly Factsheet on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Information Document (KID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

FUND OBJECTIVE, STRATEGY AND RISKS

The sub-fund aims to increase the value of your investment over the long term.

Under normal market conditions, the main part of the portfolio is invested in convertible bonds and/or other fixed income securities, bank deposits and warrants or call options on shares and, up to 10% of the sub-fund's assets in units of undertakings for collective investment that represent these asset classes. The sub-fund may also invest in shares or other instruments equivalent to shares and use derivatives for investment purposes or to reduce investment risks (hedging).

The fund manager selects - based on criteria such as product innovation, quality of management, sector leadership, valuation - companies around the world that appear to offer solid growth prospects or whose securities seem to him undervalued. The sub-fund invests in a concentrated portfolio made of shares of these companies and/or in financial instruments convertible in shares or entitling the sub-fund to acquire shares of these companies. The main part of the portfolio is managed in an endeavour to replicate the financial behaviour of a convertible bonds portfolio. To this end, the fund manager ensures that (i) at least 50% of the portfolio is invested in bonds or other fixed income instruments and (ii) the global exposure of the sub-fund to the equity market, through shares and other financial instruments whose value is linked to shares, shall not exceed 100% of the sub-fund's net asset. The manager's objective is to hedge positions in currencies other than the Euro which represent more than 2.5% of the net asset value of the share class.

You may place orders to buy or sell shares of the Fund on a daily basis.

The AH, BH and CH share classes do not distribute dividends (meaning that any income earned by the sub-fund is added to the share price). The DH share class intends to distribute a dividend annually.

The sub-fund is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 5 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio. These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.

We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the sub-fund invests and therefore the value of the shares issued by the sub-fund itself. This level of risk reflects the fact that the sub-fund invests in shares and/or other instruments (such as more volatile warrants and convertible bonds), may invest in a limited number of securities and may favor particular economic sectors or regions. Moreover, the sub-fund may invest a part of its portfolio in warrants or call options on shares that are more volatile than shares and may lose their value at expiry date.

Under unusual market conditions, other risks could arise (liquidity, default, counterparty or legal and tax risks).

As this product does not include capital protection, particularly against market fluctuations, you could lose all or part of your investment, but not more than the amount of your investment.
