Risk and Reward Profile

For further information on the Risk and Reward Profile of the sub-fund, please refer to the latest KIID and prospectus.

FUND OBJECTIVE, STRATEGY AND RISKS

In subscribing to TreeTop Multi Strategies Balanced, you are investing in a sub-fund whose objective is to provide shareholders with exposure to various asset classes indirectly through investments in units of shares of undertakings for collective investment.

Under normal market conditions, the sub-fund's portfolio mainly consists of shares of undertakings for collective investment with variable capital ("UCI"). The sub-fund may invest up to 60% of its net assets in shares of undertakings for collective investment investing mainly in shares and/or other securities giving access to the capital of companies in global developed and emerging markets (the "Global Equity Component of the Portfolio"). Up to 50% of the sub-fund's net assets may be invested in shares of undertakings for collective investment primarily investing in bonds, money market instruments or bank deposits (the "Fixed-Income Instrument Component of the Portfolio").

The Global Equity Component of the portfolio will favour shares of undertakings for collective investment managed or promoted by the Management Company or affiliates of the Management Company. Within this component, a balanced allocation between indexed undertakings for collective investment and active undertakings for collective investment will be sought. The Fixed-Income Instrument Component of the portfolio will favour shares of undertakings for collective investment managed by third parties.

The sub-fund is actively managed without referring to any stock market indices.

The sub-fund will not engage in securities lending.

These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KIID.

The sub-fund does not offer either protection or any capital guarantee or a guaranteed yield. The sub-fund is classified in this particular category because through the UCIs it holds in the portfolio, it may invest up to 60% of its net assets in equities, which are generally riskier than bonds or money market instruments. The sub-fund is also exposed to the following important risks that may not be fully captured in the risk/reward rating : credit risk (up to 50% of the portfolio may be invested in shares of UCIs investing mainly in bonds, money market instruments or bank deposits, which are exposed to the risk of default of the issuers of these debts), capital risk (the sub-fund is not subject to capital guarantee or capital protection, investors may therefore lose all or part of their capital), sustainability risk (environmental, social or governance event or condition that could cause an important negative impact on the value of an investment), risk associated with external factors (uncertainty relating to certain environmental elements, such as the tax regime), and currency risk (the assets consist mainly of shares of UCIs. Although these shares may be denominated in EUR, the assets held by these UCIs may be denominated in various currencies depending on the markets in which they invest. Fluctuations in exchange rates between the euro and these various currencies will therefore have an influence on the NAV of the sub-fund).

PERFORMANCE AND NAV EVOLUTION (Class A EUR)

NAV evolution of TreeTop Multi Strategies Balanced since 2019

Performance summary

As of 28 February 2022

	TreeTop Multi Strat. Balanced A
Cumulated returns	
February	-3.2%
YTD	-7.8%

* Some UCIs are not offered to the public in Belgium. Please consult your financial advisor for more information.

(1) **Active management** is based on one or more professionals to manage a fund portfolio according to their convictions. These convictions are based on analyses and research that they carry out in order to identify the investments that seem to be the most promising in order to outperform the market reference of the managed portfolio

(2) The objective of **passive management** is to replicate, as closely as possible, the performance of a benchmark index. The chosen benchmark comprising many components, passive management provides access to a broadly diversified portfolio

Currency breakdown

Geographic breakdown of the Global Equity Component (1)

Sector breakdown of the Global Equity Component (1)

(1) This information is based on the securities held by the UCIs in the portfolio.

* **Consumer Discretionary Sector:** encompasses businesses sensitive to economic cycles (automotive, household durable goods, textiles & apparel, hotels, restaurants, leisure facilities, media and consumer retailing).

** **Consumer Staples Sector:** encompasses businesses less sensitive to economic cycles (food, beverages and tobacco, non-durable household goods, personal products, drug retailing and consumer super centers).
