FUND OBJECTIVE, STRATEGY AND RISKS (Class A EUR)

The product aims to bring exposure to shares of companies in global developed and emerging markets indirectly through investments in units or shares of undertakings for collective investment.

Under normal market conditions, the product's portfolio mainly consists of shares of undertakings for collective investment with variable capital ("UCI"). The product may invest up to 100% of its net assets in shares of undertakings for collective investment investing mainly in shares and/or other securities giving access to the capital of companies in global developed and emerging markets.

The product will seek a balanced allocation between indexed undertakings for collective investment, aiming to track stock indices as closely as possible and actively managed undertakings for collective investment having an investment policy of selecting shares according to a manager-specific approach, regardless of whether they are part of a stock index. The choice of undertakings for collective investment will seek to ensure diversification in management styles, economic sectors and geographic areas. Active undertakings for collective investment will mainly be undertakings for collective investment managed or promoted by TreeTop Asset Management S.A. or its affiliates.

The product is actively managed without referring to any stock market indices.

You can request the redemption of your product every bank working day in Brussels, the redemption operations are carried out on a daily basis, subject to the limitations outlined in the prospectus and the articles of association.

The product does not distribute dividends (which means that the income generated by the product is added to the share price).

The product is aimed at individuals or legal entities wishing to invest for the long term (we recommend an investment horizon of 6 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio.

These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.

The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the product invests and therefore the value of the product itself.

The product is classified in this particular category because, through its portfolio invests in equities, which are generally more risky than bonds or money market instruments.

Under unusual market conditions, other risks could arise: capital risk (the product is not subject to capital guarantee or capital protection, investors may therefore lose all or part of their capital), sustainability risk (environmental, social or governance event or condition that could cause an important negative impact on the value of an investment), risk associated with external factors (uncertainty relating to certain environmental elements, such as the tax regime), and currency risk (the assets consist mainly of shares of UCIs. Although these shares may be denominated in EUR, the assets held by these UCIs may be denominated in various currencies depending on the markets in which they invest. Fluctuations in exchange rates between the euro and these various currencies will therefore have an influence on the NAV of the product). Please refer to the prospectus for more details.

As this product does not include capital protection, particularly against market fluctuations, you could lose all or part of your investment, but not more than the amount of your investment.
