Risk and Reward Profile

For further information on the Risk and Reward Profile of the fund, please refer to the latest KIID and prospectus.

FUND OBJECTIVE, STRATEGY AND RISKS

The sub-fund aims to increase the value of your investment over the long term.

Under normal market conditions, the sub-fund invests mainly in shares from issuers anywhere in the world, including in emerging markets, China and Russia. The sub-fund also invests in other types of securities that are consistent with its objective. The sub-fund may use derivatives for investment purposes or to reduce investment risks (hedging).

Fundamental to the fund manager's approach is the belief that companies with accelerating earnings growth will deliver the best absolute returns. This points the sub-fund towards those areas experiencing high growth, or where growth is re-accelerating. The subfund aims to invest in about 50 to 70 companies diversified in terms of economic sectors and geographical areas. For the AH share class only, the manager's objective is to hedge positions in currencies other than the Euro which represent more than 2.5% of the net asset value of the share class.

The MSCI All Country World index provides a reference of the investment universe of the fund manager. It is provided for information purpose only as indeed the sub-fund is managed on a discretionary basis and its portfolio will show a significant departure from the index.

The sub-fund may not be appropriate for investors who plan to withdraw their money within 6 years.

The share classes do not distribute dividends (meaning that any income earned by the sub-fund is added to the share price).

You can place orders to buy or sell shares of the sub-fund daily.

These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KIID.

The sub-fund does not offer either protection or any capital guarantee or a guaranteed yield. The risk/reward rating of the sub-fund reflects the following factors: 1) it invests mainly in shares, and 2) it may favour particular economic sectors or regions, including emerging markets. Moreover, it is also exposed to the following risks: counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund), legal and tax risks (the sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive).

PERFORMANCE AND NAV EVOLUTION (Class AH EUR)

NAV evolution of TreeTop Global Opportunities AH EUR vs. MSCI All Country World* since 2008
