TREETOP GLOBAL BALANCED (EUR)

SUB-FUND OF TREETOP GLOBAL SICAV - MANAGED BY TREETOP ASSET MANAGEMENT S.A., A MANAGEMENT COMPANY UNDER LUXEMBOURG LAW

The present Monthly Factsheet on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Information Document (KID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

FUND OBJECTIVE, STRATEGY AND RISKS

The Fund aims to increase the value of your investment over the long term through active management of a diversified portfolio composed of different asset classes. Under normal market conditions, the Fund invests in a diversified portfolio of different asset classes. It may be exposed firstly to international shares and secondly to interest rate instruments, including bonds, money market instruments and bank deposits. Exposure to interest rate instruments results either from direct investment in such instruments or from indirect investment through units in collective investment schemes invested in such instruments. The Fund may also use derivatives for investment purposes or to reduce investment risk (hedging). The sub-fund may invest in securities from issuers anywhere in the world, including in emerging markets, China and Russia. The Fund's exposure to the equity asset class will not exceed 60%. In order to diversify the sources of performance, the Fund is managed by different fund managers of TreeTop Asset Management, each applying its own approach to global active management.

The Fund is managed on a discretionary basis without reference to a market index.

For the AH and DH share classes, the manager's objective is to hedge positions in currencies other than EUR representing more than 2.5% of the net asset value of the share class.

The AH share class does not distribute dividends (which means that the income generated by the sub-fund is added to the share price). The DH and D share classes intend to distribute a dividend annually.

You may place orders to buy or sell shares of the Fund on a daily basis.

The sub-fund is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 4 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio. These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.

We have classified this product as 3 out of 7, which is a medium-low risk class. This indicator assesses potential losses in future returns at a medium-low level, and it is unlikely that poor market conditions will affect the value of the shares in which the Fund invests and therefore the value of the shares issued by the Fund itself. This level of risk reflects the fact that the fund invests up to 60% of the sub-fund in shares, that it may invest part of its portfolio in warrants or call options on shares, which are more volatile than shares and may lose all their value at expiry date, and finally because it may favor particular economic sectors or regions, including emerging markets. Under unusual market conditions, other risks could arise: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), default (an issuer's bonds could become worthless if it is unable to repay its debts), counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund), legal and tax risks (the sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive). As this product does not include capital protection, particularly against market fluctuations, you could lose all or part of your investment, but not more than the amount of your investment.
