

FUND OBJECTIVE AND STRATEGY

The fund aims to increase the value of your investment over the long term through the active management of a diversified portfolio comprising different asset classes.

Under normal market conditions, the fund invests in a diversified portfolio mainly made of shares, warrants or call options on shares on the one hand and bonds and other fixed income instruments including bank deposits on the other. The fund may also use derivatives for investment purposes or to reduce investment risks (hedging). The fund may invest in securities from issuers anywhere in the world, including in emerging markets. The fund's exposure to shares will not exceed 60%. Investments will be made either directly or through funds managed by TreeTop Asset Management.

With a view of diversifying the sources of performance, the fund is managed by different fund managers of TreeTop Asset Management, each following its own global active management approach. Most of the fund's exposure to foreign exchange risk is Euro hedged, the reference currency of the share class.
