FUND OBJECTIVE, STRATEGY AND RISKS

The fund aims to increase the value of your investment over the long term. Under normal market conditions, the fund invests mainly in shares from issuers anywhere in the world, including in emerging markets. The fund also invests in other types of financial instruments, consistent with its objective. The fund may use derivatives for investment purposes or to reduce investment risks (hedging). Fundamental to the Manager approach is the belief that companies with accelerating earnings growth will deliver the best absolute returns. This points the fund towards those areas experiencing high growth, or where growth is re-accelerating. The fund will be concentrated into 50-70 shares diversified in terms of economic sectors and geographical areas. The A euro class is majority hedged to the extent that an efficient exchange rate market in the relevant currency exists.

The risk/reward rating of the fund reflects the following factors: 1) it invests mainly in shares, and 2) it may favor particular economic sectors or regions, including emerging markets. Moreover, it is also exposed to counterparty, legal and tax risks.
