FUND OBJECTIVE AND STRATEGY

TREETOP PATRIMOINE CONSERVATIVE

The fund aims to increase the value of your investment over the medium term while protecting part of the capital invested through the active management of a diversified portfolio comprising different asset classes.

Under normal market conditions, the fund will emphasize its allocation to fixed income instruments: bonds, money market instruments and bank deposits. However up to one third of the portfolio can be exposed to equity markets. The fund may also use derivatives for investment purposes or to reduce investment risks (hedging). The fund may invest in securities form issuers anywhere in the world, including in emerging markets.

With a view of diversifying the source of performance, the fund is managed by different fund managers of TreeTop Asset Management, each following its own global active management approach. Investments will be made either directly or through funds managed by TreeTop Asset Management. Most of the fund's exposure to foreign exchange risk is Euro hedged, the reference currency of the share class.
