

MONTHLY FACTSHEET MARCH 2017

TREETOP CONVERTIBLE INTERNATIONAL (EUR)

SUB-FUND OF TREETOP CONVERTIBLE SICAV - MANAGED BY TREETOP ASSET MANAGEMENT S.A.,
A MANAGEMENT COMPANY UNDER LUXEMBOURG LAW

The present Monthly Factsheet on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Investor Information Document (KIID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

FUND OBJECTIVE, STRATEGY AND RISKS

The sub-fund aims to increase the value of your investment over the long term.

Under normal market conditions, the main part of the portfolio is invested in convertible bonds and/or other fixed income securities, bank deposits and warrants or call options on shares. The sub-fund may also invest in shares or other instruments equivalent to shares and use derivatives for investment purposes or to reduce investment risks (hedging).

The fund manager selects - based on criteria such as product innovation, quality of management, sector leadership, valuation - companies around the world that appear to offer solid growth prospects or whose securities seem to him undervalued. The sub-fund invests in a concentrated portfolio made of shares of these companies and/or in financial instruments convertible in shares or entitling the sub-fund to acquire shares of these companies. The main part of the portfolio is managed in an endeavour to replicate the financial behaviour of a convertible bonds portfolio. To this end, the fund manager ensures that (i) at least 50% of the portfolio is invested in bonds or other fixed income instruments and (ii) the global exposure of the sub-fund to the equity market, through shares and other financial instruments whose value is linked to shares, shall not exceed 100% of the sub-fund's net asset. Most of the sub-fund's exposure to foreign exchange risk is hedged back into the reference currency of the share class.

The risk/reward rating of the sub-fund reflects the following factors: 1) it invests in shares and/or other instruments such as warrants or call options on shares and convertible bonds whose value is linked to shares, 2) it may invest in a limited number of securities, 3) it may invest a part of its portfolio in warrants or call options on shares that are more volatile than shares and may lose their value at expiry date, and 4) it may favour particular economic sectors or regions, including emerging markets. Moreover, it is also exposed to the following risks: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), default (an issuer's bonds could become worthless if it is unable to repay its debts), counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund), legal and tax risks (the sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive).

PERFORMANCE AND NAV EVOLUTION (Class A EUR)

NAV evolution of TreeTop Convertible International A EUR vs. MSCI All Country World* since 1988

Performance summary
Data as of 31 March 2017

	TreeTop Conv. Intl A	MSCI AC World ²
