

The present Monthly Factsheet on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Investor Information Document (KIID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

**FUND OBJECTIVE, STRATEGY AND RISKS**

The sub-fund aims to increase the value of your investment over the long term.

Under normal market conditions, the sub-fund invests mainly in shares from issuers anywhere in the world, including in emerging markets. The sub-fund also invests in other types of financial instruments, consistent with its objective. The sub-fund may use derivatives for investment purposes or to reduce investment risks (hedging).

Fundamental to the fund manager's approach is the belief that companies with accelerating earnings growth will deliver the best absolute returns. This points the sub-fund towards those areas experiencing high growth, or where growth is re-accelerating. The sub-fund aims to invest in about 50 to 70 companies diversified in terms of economic sectors and geographical areas. The majority of the A euro class exposure to foreign exchange risk is hedged back into the reference currency of the share class.

The risk/reward rating of the sub-fund reflects the following factors: 1) it invests mainly in shares, and 2) it may favour particular economic sectors or regions, including emerging markets. Moreover, it is also exposed to the following risks: counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund), legal and tax risks (the sub-fund could be affected by foreign legal and tax changes, some of which may be retroactive).
