

TREETOP GLOBAL CONSERVATIVE (EUR)

SUB-FUND OF TREETOP GLOBAL SICAV - MANAGED BY TREETOP ASSET MANAGEMENT S.A., A MANAGEMENT COMPANY UNDER LUXEMBOURG LAW

The present Monthly Factsheet on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Investor Information Document (KIID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

FUND OBJECTIVE, STRATEGY AND RISKS

The sub-fund aims to increase the value of your investment over the medium term while protecting part of the capital invested through the active management of a diversified portfolio comprising different asset classes.

Under normal market conditions, the sub-fund invests in a diversified portfolio with an emphasis on the fixed income instruments asset class: mostly bonds, money market instruments and bank deposits denominated in Euro. However, up to one third of the portfolio can be invested in shares. The sub-fund may invest in these asset classes either directly or via units of funds. In such latest case, the subfund will invest in Euro share classes, hedged against the foreign exchange risk provided such share classes are available. The sub-fund may invest in securities from issuers anywhere in the world, including in emerging markets.

With a view to diversifying the sources of performance, the manager of the sub-fund invests in different asset classes and selects securities or units of funds in these classes managed by different managers. The portion of the portfolio invested in shares will be principally made up of units of TreeTop Asset Management funds, which each apply their own active management approach.

The sub-fund is managed on a discretionary basis with no reference to any indices.

The sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years.

The A share class does not distribute dividends (meaning that any income earned by the sub-fund is added to the share price). The D share class intends to distribute a dividend annually.

You can place orders to buy or sell shares of the sub-fund daily.

These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KIID.

The sub-fund does not offer either protection or any capital guarantee or a guaranteed yield. The risk/reward rating of the sub-fund reflects the following factors: 1) it may invest up to one third of its portfolio in shares or units of funds invested in equities and/or convertible bonds and 2) it may favour particular economic sectors or regions, including emerging markets. Moreover, it is also exposed to the following risks: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), default (an issuer's bonds could become worthless if it is unable to repay its debts), counterparty (the sub-fund could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the sub-fund legal and tax risks (the fund could be affected by foreign legal and tax changes, some of which may be retroactive).

PERFORMANCE AND NAV EVOLUTION (Class A EUR)

NAV evolution of TreeTop Global Conservative A EUR since 2015
